STOCK BEER PUMP CLIP SHAPES

We have the clay cutters for these shapes, so you can design your artwork within the shapes. Open the .pdf in an Illustrator document, and enlarge the shape you want proportionally. Phone if you need an exact size profile to be emailed to you.

Up to 12 original shapes can be hand cut for small orders of clips, but for larger and repeat quantities of the same shape to be consistently accurate it is recommended that a profile cutting ejector tool be made.
